

OUR FIRM

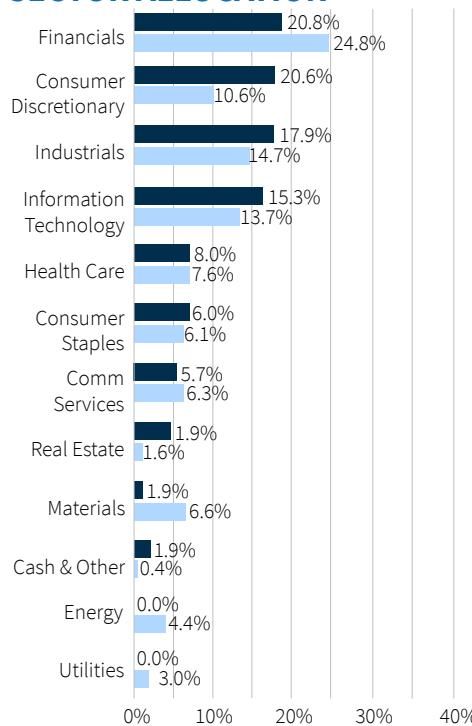

Reinhart Partners, founded in 1991, is an asset management firm based in Milwaukee, Wisconsin. The firm specializes in managing high quality small and mid cap domestic equity strategies. Reinhart Partners manages assets for institutions and high-net worth individuals through separately managed accounts, model portfolios, and Reinhart Funds.

OUR PROCESS

The International Private Market Value (PMV) investment strategy seeks long-term capital appreciation by investing in stocks of small, medium, and large capitalization companies. The team utilizes PMV methodology for determining a company's true intrinsic value. It is calculated by observing actual merger and acquisition (M&A) transactions and applying corresponding and industry-specific valuation multiples to stocks we analyze.

- Our PMV investment philosophy seeks capital appreciation while minimizing downside risk.
- Extensive focus on durable competitive advantage including barriers to entry and customer captivity.
- M&A insight provides customized valuation metrics by industry to capture appropriate value drivers.
- Consistent and objective PMV discipline minimizes behavioral biases.

IMPORTANT DISCLOSURES

Return on Equity (ROE) is the amount of net income returned as a percentage of shareholders' equity. Return on equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested.

Dividend yield is calculated by annualizing the last quarterly dividend paid and dividing it by the current share price.

Portfolio Turnover is a measure of how frequently assets within a fund are bought and sold by the managers.

Active Share measures the degree of difference between a fund portfolio and its benchmark index.

The 30-day SEC Yield represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the 30-day period. The SEC Yield should be regarded as an estimate of the fund's rate of investment income, and it may not equal the fund's actual income distribution rate, the income paid to a shareholder's account, or the income reported in the fund's financial statements.

The 30-Day SEC Yield Unsubsidized reflects the yield of a bond fund without any fee waivers or reimbursements, providing a clearer picture of the fund's potential income under normal expense conditions.

The primary benchmark for this composite is the MSCI ACWI ex USA Index (USD). The MSCI ACWI ex USA Index captures large and mid cap representation across Developed Markets (DM) countries (excluding the US) and Emerging Markets (EM) countries. The index covers approximately 85% of the global equity opportunity set outside the US. Index information is included merely to show the general trend in the market for the periods indicated and is not intended to imply that the portfolio was similar to an index either in composition or element of risk. An index is unmanaged, and an investment cannot be made directly into an index. Index returns do not reflect the deduction of advisory fees or any other fees or expenses. Index returns reflect the reinvestment of dividends, interest, and other earnings.

Investing involves risk. Principal loss is possible. Investing in small and medium-sized companies involves greater risks than those associated with investing in large company stocks, such as business risk, significant stock price fluctuations, and illiquidity.

Before investing, investors should consider carefully the investment objectives, risks, charges and expenses of a mutual fund or portfolio. This and other important information is contained in the prospectus and summary prospectus. To obtain a hardcopy of the prospectus, please call 1-855-RPI-FUND (1-855-774-3863) or you may download the prospectus, which can be found under "Quick Links". Read it carefully before investing.

Must be preceded or accompanied by a prospectus.

Investments in securities of foreign issuers involves risk not ordinarily associated with investments in securities and instruments of U.S. issuers, including risks related to political, social and economic developments abroad, differences between U.S. and foreign regulatory and accounting requirements, tax risks and market practices, as well as fluctuations in foreign currencies.

Reinhart products are offered only to United States residents, and information on this site is intended only for such persons. Nothing on this website should be considered a solicitation to buy or an offer to sell shares of Reinhart products in any jurisdiction where the offer or solicitation would be unlawful under the securities laws of such jurisdiction.

Past performance is not a guarantee of future results.
